Installation Olivia Steele's Neon Art

"Is contrast the greatest teacher? Artist Olivia Steele seems to think so, and her lyrical neon sculptures certainly do bring one into a moment of enlightenment. Steele is a conceptual artist working to question modern culture and our innate perceptions. By placing provocative neon statements in contradictory spaces she begins a dialogue that gets her viewers questioning and reflecting on the world around them. Steele also juxtaposes her neon statements with iconic imagery to further jar her viewers beyond the everyday. The wide range of interpretation her work presents is endless, a refreshing change from the overbearing gallery plaque."
